# BID NOTIFICATION

## Sub-Bids Requested For

### Tacoma Central Treatment Plant DAFT Co-Thickening Modifications Tacoma, WA

**Bid Date: September 29, 2009**

**Bid Tim: 11:00am PDT**

Project Description: Project Description: Includes but is not limited to: 1. Demo of several hundred lineal feet of 8" diameter steel pipe, fittings, and valves in existing tunnels and equipment galleries; 2. Several hundred lineal feet of new 6" diameter glass-lined steel pipe for primary sludge conveyance in existing tunnels and galleries, including pipe provided to replace the pipe demolished as described in Item 1 above; 3. New buried 6" diameter glass-lined steel pipe, including all trenching and backfill; 4. New flat aluminum covers over existing rectangular concrete tanks; 5. New dissolved air flotation thickener saturation equipment; 6. New instrumentation and controls for the sludge pumping and thickening operations. Integration of controls with existing DCS system; 7. Modifications to existing odor control system, including new ductwork, new exhaust fans, and caustic storage and injection system; 8. New electrical raceways, motor control centers, and other modifications as necessary to power new equipment, valves and instruments; 9. Misc piping and equipment as specified in the Contract Documents.

Estimated value: \$3,389,473.00

Contract Duration: 365 calendar days

Please note that this project contains City of Tacoma HUB and LEAP requirements. Please review the specifications for additional information.

This project is subject to WA State L&I Prevailing Wage rates. Certified payroll will be required.
